■ The SmartView Image System offers two selections for your convenience and preference. The compact digital camera allows you to take pictures from the camera and stores in the memory card without any hassle. The portable and light design allows you to carry it with ease. The 5MP scientific grade camera provides an excellent image to your laptop through the USB connection whereas the digital camera type offers computer free operation. The SmartView Image System completes the SafeBlue electrophoresis series for all your needs - from gel casting, gel electrophoresis to gel documentation; all in one system. The complete SmartView system not only saves your lab bench space, but also provides excellent portability to move from lab to lab.

▶ **Features**

- Light weight and space saving design
- Ready to use out of the box; just connect and capture
- Two camera types available: choose digital camera or scientific grade camera
- Designed for SafeBlue electrophoresis system to complete cast, run, and capture
- Adaptable to any 21 x 26cm UV transilluminator with optional accessory
